mid-March 2010, date to be confirmed to registrants only.

Book today, limited capacity.

SPONSOR THIS PRESENTATION & CAMPAIGN

100% Cashback on Success

Prosperity, Hope & Opportunity for All

Unlike other sponsorship propositions this one offers you your money back on the success of this appeal to the government for aid in saving Woodford Aerodrome from closure and reviving the UK manufacturing sector to redress the balance in the economy away from dependency on the financial services sector.

The following is a description of this opportunity and the presentation intended for MPs in London.

This presentation is intended to:-

1. Offer a new economic alternative to the government, a solution to the current recession through large-scale investment in the manufacturing sector, a better, more optimistic option for future government economic strategy over fiscal restraint.
2. Raise funds for the rescue of Woodford Aerodrome and revival of the civil aerospace industry.
3. Undertake a range of new research and development projects into advanced aerospace projects in the civil markets.

The associated campaign will:-

1. Present a strong case to the government, as the only effective source of large-scale investment capital, for investment in the future of the aerospace and related technology industries.

2. Take the message to the popular press and raise public support leading up to the next general election.
3. Make approaches to the Prime Minister as the only effective decision-maker for this initiative.
4. Reach out to the investment banking community for alternative sources of further development capital.

If you have already read about the Woodford Aerodrome Rescue plan you are aware of the core plan behind this presentation - to save Woodford from closure, create a new centre of excellence for the aerospace industry, expanding the scope of this to embrace the wider needs of the UK's high technology industries and revive the manufacturing economy in this country.

This, I estimate, can be done at little or no risk or cost to the taxpayer, offer huge rewards to the Treasury in clearing the national debt and provide a striking, alternative to political thinking on economic strategy.

We have only a few weeks to awaken the government to this opportunity before an election is called and their policies become set in stone for another five years. The presentation is intended as a wake-up-and-see-the-sunshine call to all politicians - it is NOT a protest campaign, it is NOT an aggressive assault on government policy.

This is the solution.

Campaign Notes: Two local MPs in the North West are sympathetic to the need of Woodford and the industry, and will lend their assistance in this presentation.

The sponsorship covers three stages, depending on how much support and success is achieved:-

Minimum Sponsorship	
One-day presentation	Sponsorship Required: £6,000
This will cover the costs of a venue, technical accessories, overheads, etc., modest publicity, a little print activity and some press follow-up from a single day presentation. The press campaign might entail several interviews on TV and elsewhere with a handful of trips to London. Nothing else.	
Prospect of refund: minor.	

Modest/Optimum Sponsorship	
1-6 month press campaign	Sponsorship Required: £6-15,000
After the initial presentation a press effort and public information effort will follow the general election campaign, to try pressing politicians to alter their economic strategies in favour or prosperity over prudence. Thus: more visits with the press, recruiting leading figures prepared to support the initiative, producing a video record of the presentation for broadcast on the internet.	
Prospect of refund: reasonable.	

Maximum Sponsorship	
6-12 month Programme	Sponsorship Required: £15-100,000
Building on the previous stages and plans this programme redirects attention to the private sector investment community, to attract further seed and development funding for the campaign and alternative strategies to raise money from open-minded and more imaginative	
Prospect of refund: good.	

Sponsorship refund is not a solicitation to invest, but a reasonable guarantee of return based on the following: That should I raise sufficient support to undertake and complete the rescue of Woodford Aerodrome, you, the sponsor to this campaign will share in the rewards with a refund at a ratio of 20:1. Thus, for every £1,000 contribution in sponsorship you will receive £20,000 in return on the successful conclusion of Woodford's rescue as a new business unit.

Sponsorship Notes:-

1. You do not need to place all your sponsorship at the beginning. You can place a small amount for stage one then see how it goes. If you like the progress you can contribute more to later stages.
2. The refund is conditional on me having control of enough funding to fulfil this guarantee.
3. My own background as an experienced trusted escrow agent, certified by HM Revenue & Customs, means that I have been trusted with large funds by other parties in numerous inter-business transaction, and this can be verified to you upon request.
